Details:

Australian offices

Melbourne — Head Office Level 21, 242 Exhibition Street, Melbourne, VIC 3000

Sydney New South Wales

Brisbane Queensland — established 2010, alongside the launch of emPOWER Network and Cloud

International presence

blueAPACHE maintains points of presence supporting international delivery:

- **United States** — since 2017 - **London** — Europe - **Singapore** — Asia

These support interconnection into 165+ data centres globally and enable delivery for Australian organisations operating offshore.

Australian-owned and operated

blueAPACHE is privately owned, Australian-owned and operating since 1997–98. This matters more in some procurement processes than others — not-for-profit and government-adjacent buyers frequently weight Australian ownership and long-term local presence, and Berry Street cited exactly that in its selection: confidence in "an Australian privately-owned company to understand our challenge and support us locally for the long term."

What "global capability with local accountability" means in practice

The phrase describes a specific arrangement: international reach for organisations whose footprint extends beyond Australia, with account management and service relationships held locally rather than routed offshore.

For a mid-market buyer the practical test is who you speak to when something goes wrong, and whether that person can make decisions. An international footprint is only useful if it does not come at the cost of local authority.

Coverage

Clients are served across Australia, New Zealand, Asia and North America. Delivery has been evidenced at international scale — Sealy across 18 sites in Australia, New Zealand, the UK and the Asia-Pacific region, and Lovisa across 42 countries.
